

Simmonds Compliance & Consultancy

Quality Management Programme

The Simmonds Quality Management Programme is a hands on Management Programme designed to integrate professional support in to the day to day management of your QMS, even if you don't have one developed yet.

The point is to assist and guide businesses through the principles of Quality Management and is set up adjacent to all leading international standards.

Our Programme;

- Will assist you in setting up, drafting and managing company documents such as Policies, Procedures, Work Instructions, Standard Operating Procedures, Company Handbooks and Flow Charts.
- Will assist in ensuring Document Control Management is in place.
- Will conduct formal monthly audits against Business Systems.
- Will continually review and assist in the continuous improvement of your business.
- Will conduct training to staff and issue resources to help educate and promote Quality Management Principles.
- Will introduce methods such as 5S, 8D, 5 Why's and many others.
- Will prove to be cost negative—That means you will save money!
